

Discharge Presses

Jaygo Discharge Presses are designed to press mixed product from Planetary and Multi-Shaft mix bowls into drums, pails, cartridges, etc... or into secondary mix vessels for further processing.

Benefits of Jaygo Discharge Presses:

- "Hands-free" discharge and transfer of mixed material
- Various controls including hand or foot-operated valves
- Volumetric or gravimetric proportioning systems are available where greater accuracy or automation is desired
- Operator contact is greatly reduced, enhancing safety and reducing the risk of contamination
- Save time and reduce production costs

Rebuild & Refurbish Services

Jaygo specializes in repairing, refurbishing, and rebuilding Double Planetary and Multi-Shaft Mixers from Jaygo and its competitors.

- All rebuilt and refurbished equipment is completely dismantled, cleaned, sand-blasted, and inspected
- Where necessary parts are built-up with weld, machined, ground, and polished. All bearings, seals, o-rings, gaskets, grease, oil, wiring, switches, instruments, and belts are replaced
- Parts are re-assembled, primed, painted, and run-tested prior to return or sale

Discharge Press for 100 Liter Planetary Mix Bowl
